

# Getting started in the Ensemble Pod

\*All pod equipment should remain connected and powered on.\*

## To quickly get started:

1. Plug your headphones into the Aviom monitor mixer or the AKG headphone amp.
2. Adjust the Aviom monitor mixer to hear the rooms you'd like.
3. If level adjustments are needed on microphones, adjust the "Input 1/2" knob.
4. Adjust the MASTER VOLUME knob to a comfortable level.
5. Login to the computer with ONYEN and open Zoom for video

## Helpful tips:

Point the microphones in the direction of the instrument.

Stay 3'-6' away from the microphone.

Adjust your microphone levels so they peak into the yellow on the meters.

Use the panning feature on the Aviom monitor mixer to hear different rooms in left and right ears.

To turn up/down all the channels on the monitor mixer, press and hold SOLO & MUTE while turning the adjustment knob.

The camera position is adjustable by loosening the collar of the tripod.

## Troubleshooting:

If no levels appear in the meters on the X2P, make sure the 48V buttons are lit.

If no camera is detected, make sure the camera is powered on.

---

# Getting started in the Lesson Pod

\*All pod equipment should remain connected and powered on.\*

## To quickly get started:

1. Plug your headphones into the Focusrite X2P.
2. Adjust your microphone levels (INPUT 1/2) so they peak into the yellow on the meters.
3. Adjust HEADPHONES level to comfortable level.
4. Login to the computer with ONYEN and open Zoom for video

## Helpful tips:

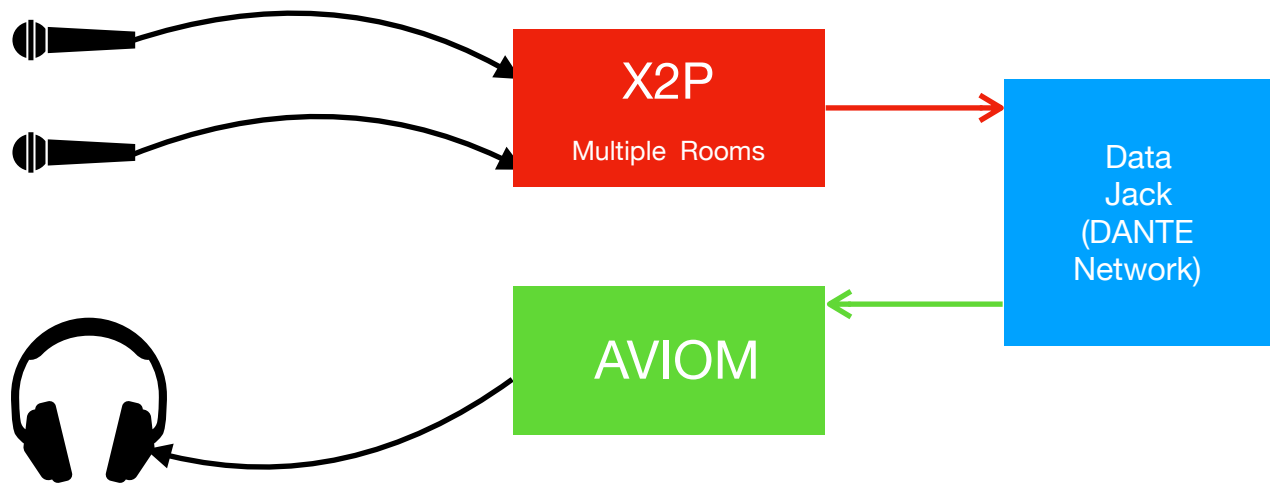

To hear less of yourself, move the INPUT MIX knob towards the NETWORK.

## Troubleshooting:

If no levels appear in the meters on the X2P, make sure the 48V buttons are lit.

If no camera is detected, make sure the camera is powered on.
